• • •	BC	lient\VB CommandLine Compilation For VBAutomation.txt	1
1	-	Assuming 64 Bit COM Automation Dll Server, COM Proxy/Stub Dll And	+
		TypeLibrary Tlb Are Created And Copied To	
2		Windows\System32 And From Here The Proxy/Stub Dll Is Already Registered By	7
		RegSvr32 Command.	
3			
4	-	Then From Windows\System32\Hosted Tlb File, A DotNet Compliant Dll Is	4
		Created Into The VB Source Code directory	
5		By Using Following Command In Visual Studio 2013's "64 Bit Native Command	+
		Prompt" :	
6			
7		tlbimp c:\Windows\System32\AutomationServerTypeLib.tlb /out:.	7
		\AutomationServerTypeLibForDotNet.dll	
8		The Devileting Devilet Complete Dill Tolling I Tolling College	
9	-	The Resulting DotNet Compliant D11 Is Used In VB Code As Namespace And As	+
10		Well As On Compiler Command Line	
10		To Create The Executable :	
11		who /thurinaya /nuMichacoft VicualDacic dll /	
12		<pre>vbc /t:winexe /r:Microsoft.VisualBasic.dll / r:AutomationServerTypeLibForDotNet.dll VBAutomation.vb</pre>	+
13		P.Automationserver Typelibrorbotnet.uii VbAutomation.vb	
	_	Run VBAutomation.exe	
14 15	-	Null VDAUCOIIIactori.exe
